## MURDERER MAKES A CONFESSION

F C. Fischer Tells Judge Noyes How He Killed His Wife.

HE CHOKED HER TO DEATH.

He is a Hereditary and Natural Criminal-Has Done Time in Sing Sing and Jollet.

Riverside, Cal., April 29.—F. C. Fischer today confessed to Judge Noyes that he murdered his wife, Clara Fischer, who was found dead last Thursday; that all his life he has been a criminal, and that his mother before him was a sefectional thief.

Fischer said the murder was not premeditated. He was getting material ready for dying ciothes, when the idea seized him to kill his wife. Thereupon he told her he would remove a growth from her eyelid if she would take a few whiffs of chloroform, which was an ingredient in the dyeing material,

As soon as the woman was partly un-conscious from the anaesthetic he threw her to the floor, choked her to death and then covered her body with gasoline and set fire to it. Fischer expressed no remorse for the deed.
In conversation with Judge Noyes the In conversation with Judge Noyes the man said he had served a three years' term in Sing Sing prison, New York, for grand larceny and a year and a half in Joilet, Ill., for robbing the wife of Judge Garey of Chicago, who had entrusted him with money. He also acknowledged the published reports to the offset that he had married a widow the effect that he had married a widow and tried to kill her for her money to

According to his statement, Fischer served three years in an Illinois prison for robbery of a woman. He owned to having two wives now living.

ther Districts Report Great Success And School Problem is Now Practically Solved.

Interest still centers in the public chools and committees are still at work oing all they can to raise the required ums. Not a few districts are practically rovided for and those yet behind will loubtless receive aid sufficient from outside sources to justify the announcement that they, too, will be able to remain open the full term. The patrons of the owell held a meeting last night and received gratifying encouragingment, while he Emerson, which is shy something over \$300, will give an entertainment in the school building on Monday evening, at which time it is expected sufficient money will be raised to keep the school open another month. The Commercial club promises to meet all deficits, provided they are not too large, and to that end is soliciting subscriptions from men of means. An effort is also being made to keep the West Side high school in operation and the outlook for success is quite encouraging. The Alumni association of the Salt Lake high school has decided to lend a helping hand in the matter of assisting that school out of its present difficulty, and has called a meeting for Friday evening at 7:30 at the office of the board of education in the city and county building, to which all the members of the association are invited. As to this school and the prospects for its remaining open, Principal Eaton has issued the following: school building on Monday evening, a

WEST SIDE HIGH SCHOOL.

The difference between this and the estimated production represents the foreign ores smelted in this country.

The total production of refined lead by the desilverizers follows: Total refined lead, 285,010 short tons; foreign base bullion, 95,495; foreign ores, 13,099.

Of 95,495 tons of foreign base bullion refined in bond, 73,632 short tons were exported, as were also exported 5,249 short tons of lead obtained from smelting foreign ores in bond. Production of hard lead was 9,169 short tons in 1902, against 10,656 tons in 1902. "The West Side high school has left no stone unturned in the endeavor to keep all departments of the school going to the end of the year, although the efforts to elicit support have so far been confined to patrons of the school. You may put it down that we will continue to the end, for we believe and in fact konw that when parents but realize all it means for their children, for the city, and for themselves, they will not hesitate to come forward and face the facts with their dollars. It costs just \$3,00 to run the high school for the remaining five weeks, and of this amount we have \$1,140 subscribed from 302 pupils, or a per capital of \$3,56. In addition, the teachers have subscribed \$566, or something more than one week's salary, making a total of \$1,706, or a balance of \$1,339 yet to be raised.

"Everyone knows that the high school training is necessarily more expensive than that in the lower grades, but the actual cost of running our different departments, and the real benefit accorded the pupil, is proportionally greater. Many parents have been non-committal and have so far pledged nothing, awaiting the general resuit. In reality they wish the schools to go on, but, as in every public enterprise, there are those who hang back till they see that success is evident and then go ahead. "The West Side high school has left no veteran comedian, died tonight of heart years old and had been on the stage for
